

Yuval Binur, PhD
Managing General Partner
Accelerated Technologies Partners, LLC

Dr. Binur has over 26 years of venture capital experience in the US, Europe and in Israel. In the year 2000, Dr. Binur co-founded, together with Martin B. Leon, MD, Accelerated Technologies, Inc. (ATI) - an investment firm applying a highly differentiated strategy for initiating and investing in medical technologies. Prior to that, Dr. Binur has been a founding managing partner of Medica Venture Partners, a global health care and life sciences venture capital fund operating from Israel. For 9 years prior to co-founding Medica, Dr. Binur was a member of Adler & Co., a major U.S. venture capital firm based in New York. Throughout his career in venture capital, Dr. Binur has been a board member of over 30 venture-backed companies in the areas of pharmaceuticals, medical devices, software and electronics among other boards. Dr. Binur was a director of Percutaneous Valve Technologies, Inc. (PVT), a company that has revolutionized the percutaneous replacement of heart valves and was sold during 2004 to Edwards Lifesciences, Inc. Currently, Dr. Binur is a director of SuperDimension, Ltd, a pioneer in the area of interventional pulmonology; Pathway Medical Technologies, Inc., a company addressing Peripheral diseases and a number of other medical technology companies.
